PAGE SPEED INSIGHTS

Performance Analysis

The website shows good desktop performance but mobile speed can be improved

Recommendations:

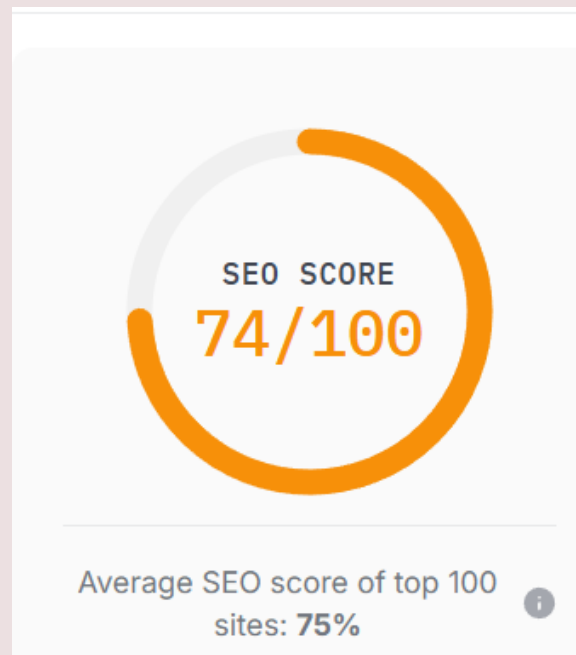

Compress images

Reduced unused Javascripts

Improve Loading speed

03

SEO SITE CHECKUP

SEO SCORE Analysis

Seo Score: 74/100

The website has a strong SEO foundation with properly optimised pages and mobile responsiveness.

META Tags Selection

Meta Title Test

100% of top 100 sites passed

This webpage is using a title tag with a length of **16 characters**. While there's no target number of characters, titles should be descriptive and concise. Using a title tag with less than 20 characters is a missed opportunity since it can be difficult to fit all your targeted keywords in such a short text.

We recommend using a title with a length **between 20 - 60 characters** in order to fit Google Search results that have a 600-pixel limit.

Text: Site Maintenance

Length: 16 characters

Meta Description Test

92% of top 100 sites passed

This webpage is not using a meta description tag! You should include this tag in order to provide a brief description of your page which can be used by search engines. Well-written and inviting meta descriptions may also help click-through rates to your site in search engine results.

How to fix

META Tags Optimisation

The websites uses optimised meta titles and descriptions that help improvesearch engine visibility and click through rate.

Heading Structure

**Heading Tags Test**

This webpage contains headings tags.

62% of top 100 sites passed

H1 tags

Oops! Something went wrong

The website uses proper hierarchy which improves readability and SEO structure.

However, the SEO tool was unable to fetch complete H1 tag due to dynamic website content rendering

Image Alt Structure

 **Image Alt Test**

This webpage doesn't use "img" tags.

78% of top 100 sites passed

Some images may require improved alt text optimisation for better accessibility and image SEO.

Mobile Friendliness

The audit tool identified minor mobile responsiveness issues related to viewport settings and media queries. Improving responsive design implementation can enhance mobile user experience and SEO performance.

Robot.txt Analysis

Robots.txt Test

99% of top 100 sites passed

This website is using a robots.txt file.

`</>` <https://www.myntra.com/robots.txt>

The website uses a properly configured robots.txt file which helps search engines understand which pages should be crawled or restricted.

Sitemap Test

Sitemap Test

83% of top 100 sites passed

This website lacks a sitemap file! Sitemaps can help robots index your content more thoroughly and quickly. Read more on Google's guidelines for [implementing the sitemap protocol](#).

 [How to fix](#)

The sitemap test failed, indicating that the audit tool could not detect a valid XML sitemap. Implementing a sitemap can improve search engine indexing and crawlability.

Server and Security

Server and security

Score: 100 Failed: 0 Warnings: 0 Passed: 7

✓

URL Canonicalization Test

93% of top 100 sites passed

<https://www.myntra.com/> and <https://myntra.com/> resolve to the same URL.

i

✓

04

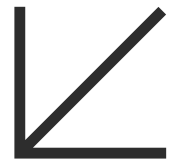

FUTURE RECOMMENDATIONS

- Improve mobile responsiveness
- Optimize page loading speed
- Maintain XML sitemap regularly
- Improve Core Web Vitals
- Enhance image optimization
- Monitor JavaScript issues
- Strengthen internal linking
- Perform regular technical SEO audits

05

CONCLUSIONS

The SEO audit of Myntra shows that the website has a strong SEO foundation with secure HTTPS implementation, optimized structure, and good overall performance. However, improvements can be made in mobile optimization, page speed, sitemap management, and technical SEO monitoring to further enhance user experience and search engine visibility.
